Good morning students ,
XIIB Computer Science : (02nd may, 2020 ) :

Write down the following programs for the practical file :

1. WAP to find out whether a given number is palindrome or not .
2. WAP using function to return the sum of series :
2+4+6+8+10+........+N
3. WAP to convert temperature in Farenheit to Celcius .
4. WAP to find the area of a triangle, rectangle and circle using function .
5. WAP to input a number and print it's first 10 multiples .
6. WAP to exchange first half elements of list with second half elements . Assuming that the list is having even number of elements .

Please upload the homework by Sunday night (9 pm), definitely .

That's all for today .
Thanks
